SOCIAL HUB

If you are looking for a Social Group for your child to practice their speech therapy and OT skills, while building new friendships and having fun along the way, book them into our Social Skills Support Program.

Social Hub is a fun weekly program, where our participants can put their social skills into practice. There is 1 hour of outdoor play including – tag, bullrush, soccer, handball, chalk drawing and much more. Participants are encouraged to assist with cooking, playing card and board games, and we even offer multiplayer Nintendo Switch games including:- Sports, Mario Cart, and Smash Bros. (This activity is used to reinforce appropriate gaming behaviour, promote online safety, and encourage cooperation between players. Time is limited to 30mins at the end of the session and is completely monitored and supported by a Support Worker.) We also offer community access towards the end of the program, will help your child to safely engage in the community and build confidence in larger social settings.

NDIS or Private funding accepted
for plan-managed or self-managed participants.
