Social Club

A Teen & Young Adult Hang-Out Space at The Hub

Social Club is a relaxed, therapist-facilitated group held at The Hub, designed for teens and young adults who want a safe place to connect, belong, and build real-world social skills in a natural and supportive environment.

Rather than “teaching” social skills in isolation, Social Club creates opportunities for on-the-spot, real-life learning while participants engage in shared interests such as Minecraft, Chess, Catan, Boardgames, Nintendo Switch, or simply hanging out and chatting with friends.

Our therapists gently guide interactions as they occur, supporting participants to practice meaningful communication, navigate group dynamics, and build confidence in social situations — all while having fun and feeling accepted.

For more information about Social Club, please contact GC Therapy Hub via email or phone. Program dates and session times can be found on our website under the term timetable.
